

The law definitely has to stay in place. It is necessary to have the federal government to step in with this type of situation; to allow families, like my own, to sit together for dinner and not get interrupted by unwanted phone calls from companies that will not enrich my life at all. I appreciate everyone that was involved to get this law passed in the beginning and now we are asking for those same people and others to keep it a law. Thank you for your time and helping families to have quality time together after a long day at work. It is greatly appreciated!!
